

New Jersey Division of Highway Traffic Safety

Crash Data Retrieval (CDR) Technician Training

This training course offers the crash investigator insight into the operational function of the Bosch Crash Data Retrieval (CDR) System. At the end of this training, a Technician is expected to image and preserve data in a format such that the "CDR Data Analyst" would be able to use the collected data together with situational complete reconstruction. Although the CDR Technician course replaces a portion of the previously offered "CDR Operator's Certification Course", it does *not* address any analysis of the extracted/harvested data. This one day course is best suited for field/on-scene investigators; it is also required as a prerequisite for the CDR Data Analyst's course. If you have attended an Analysts and/or a Technician course more than a year ago, this training course will serve as a much needed update on newly added vehicles, software, and additional storage modules.

Major course topics include:

- General legal considerations (criminal and civil) related to CDR data collection.
- Types and locations of data typically stored in GM, Chrysler, and Ford vehicles.
- The operation of the CDR System to include evaluation of the vehicle being examined for download and application of the software and hardware for GM, Chrysler, and Ford vehicles.
- Operation and vehicle coverage of the newly released 3.0 CDR software.
- Troubleshooting and solving hardware and software issues when using the Bosch CDR System.

Ownership of a CDR System is encouraged, but not required for the training. The design of this training is such that even those who have not yet obtained a system will better understand this evolving technology and benefit from the information. Course completion meets the requirements for recognition as a Bosch CDR System Data Collection Technician. All sessions will be held from 8:00 am to 4:30 pm.

Registration Form

No Charge: *This program is funded by the NJDHTS.*

Name: _____

Organization: _____

Work Address: _____

Home Address: _____

Work Phone: _____

Fax: _____
